Vijayawada, Andhra Pradesh, India

PROFESSIONAL SUMMARY

Full Stack Developer with **8 months of hands-on experience** building scalable, production ready web applications using React.js, Node.js, and AWS. Shipped a complete MERN platform solo, from schema to cloud deployment. Strong in REST API development, real-time systems (Socket.io), JWT authentication, and RBAC. Writes clean, maintainable code focused on performance and cross-browser compatibility.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, SQL, HTML5, CSS
- **Frontend:** React.js (v19), Redux, Tailwind CSS, Vite, Responsive Web Design
- **Backend:** Node.js, Express.js, REST API Development, Socket.io (Real-Time), JWT, Bcrypt, API Security, Nodemailer, Role-Based Access Control (RBAC)
- **Databases:** MySQL, Amazon RDS, SQLite3, Database Design
- **Cloud & Tools:** AWS (S3, RDS), Git, GitHub, Postman, Jira, Lambda (Basics), Nginx, PM2, Linux (Basics) (Ubuntu), SSH, Cloud Deployment, CI/CD Pipelines
- **Software Engineering:** Data Structures & Algorithms, OOP Concepts

PROFESSIONAL EXPERIENCE

Frontend Developer Intern | Ad Binary, Vijayawada

7th May 2025 – 7th Aug 2025

- Built **20+ reusable React.js components** using Tailwind CSS cut component build time by **~35%** across the project.
- Reduced page load time by **~28%** using lazy loading and component optimization measurably improved Core Web Vitals.
- Wired **10+ REST API endpoints** using ES6+ async/await eliminated full-page reloads and delivered real-time UI updates.
- Eliminated **~40% of QA-reported UI bugs** by enforcing cross-browser compatibility across Chrome, Firefox, and Safari.
- Delivered **100% of sprint features on time** across a 4-month Agile engagement using Git and Jira.

Freelance MERN Stack Developer

Dec 2025 – Jun 2026

Event Booking & Media Management Platform | MERN Stack

Links: [Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Shipped a **full MERN stack platform in 10 days** — schema design to cloud deployment, built solo.
- Secured **3 user roles** using JWT + RBAC — **zero auth vulnerabilities** across all access levels.
- Handled **500+ concurrent sessions** using Socket.io — no performance degradation under real-world load.
- Achieved **~99% payment success rate** using Razorpay — order creation, verification, and failure recovery fully handled.
- Architected cloud backend using **AWS S3 + Amazon RDS** — production-grade media storage and structured data, concurrent-load ready.
- Reduced runtime failures by **~60%** using structured error handling and API validation middleware across all endpoints.

PROJECT EXPERIENCE

College Management System

- Secured auth for **3 user types** using JWT refresh tokens + bcrypt — automated password reset via email.

- Built **3 live analytics dashboards** (attendance, exams, placements) using React.js — cut manual reporting time by **~50%**.
- Handled bulk file uploads using **AWS S3 + role-based access control** — zero unauthorized access incidents.

Shop Billing & Inventory Management System

- Replaced manual billing using Node.js + MySQL — cut operational effort by **~40%** and eliminated calculation errors.
- Automated real-time stock sync using event-driven backend triggers — inventory accuracy improved to **~95%+**.
- Designed normalized MySQL schema — supports **future features** with zero restructuring required.

PROJECT HIGHLIGHTS

- **5+ production-grade GitHub repos** full-stack, real-time, payment-integrated, and cloud-deployed.
- Shipped **3 complete systems independently** each covering auth, APIs, database, and cloud infrastructure.
- Consistent delivery under pressure from zero to live production deployment.

EDUCATION

- **B.Tech in Information Technology** *Graduation: 6th June 2018 - 7th July 2022*
- S.R.K Institute of Technology, Vijayawada | CGPA: 6.41
